Telecom Infrastructure: Construction and O&M

Services

- OFC Based Network
- Operations & Maintenance Services
- Outside Plant Management System
- Infrastructure Development
- FTTH-GPON Network with RF Video Overlay
- End-to-End Wireless Solution
- ADSS Cables Planning, Preparation & Handling

Turnkey Projects

OFC Based Network

The Turnkey Division is actively involved in the execution of OFC based Backbone and Backhaul Networks. We have successfully carried out OFC projects all over India. Our customers include service providers such Reliance Jio, Airtel, Vodafone Idea, BSNL, ITI limited etc. Mehta Infocom Private Limited covers every stage from project definition through planning to deployment and system optimization.

- Planning and engineering
- Site engineering
- OFC Works
- Supply and warehousing for equipment material
- Supply of auxiliary equipment / services
- Documentation

Operations & Maintenance Services

We have the expertise and experience of operation and maintenance (O&M) of OFC based long distance networks.

The services offered are:

- Patrolling of O.F. cable routes
- Maintenance of utility system
- Maintenance of Transmission Equipment
- Corrective maintenance of faults in various subsystem
- Spare Management

Turnkey Projects

Outside Plant Management System

Outside Plant (OSP) network also at times referred to as the last mile solution is an important component of a telecom network. It connects the subscribers' premises with the node / exchange. Mehta Infocom Private Limited has developed an outstanding expertise in planning, engineering and execution of OSP projects.

The types of services rendered are

- Design, Planning & Engineering of OSP Network. Primary, Secondary & Distribution Network

- ROW Permission

- Procurement of Pipes, OF Cables, Cabinets, DPs etc.

- Trenching and Trenchless (HDD, Mauling) way of laying of Ducts, installation of manholes

- Cable pulling, jointing, termination and testing

- Installation of Manholes and Route Markers

- Handing over of the network

An important feature of outside plant is to have information available about every subscriber cable pair at a centralized place. This enables to check the feasibility of providing new lines especially on the congested routes and to attend to a line fault in case of a line fault on a cable pair.

Infrastructure Development

We provide complete range of infrastructure development and civil services related to Telecom Network Projects.

- Site surveys, suitability reports and accordingly site selection

- Soil investigation, foundation design

- Installation of Power Supply System (includes rectifier, battery banks, DG sets etc.)

- Route survey, route selection and preparation of detail survey drawing

- Trenching in all type of soil (Normal, Soft Rock & Hard Rock)

- HDPE pipe laying, installation of manholes, route markers etc.

Our Promise

OUR VISION

To give our customers the benefit of the technological advancements in CATV, Broadband and telecom products. To provide unprecedented support with reliable services.

OUR MISSION

We intend to support our vision by providing the most advanced products and services catering to our customers so as to empower them with the latest trend in the industry. A happy customer base is a parameter for any successful organization. We strive hard to strengthen this base through excellence by upgrading ourselves and bringing in the latest technology. We always give precedence to create an ecosystem for all associates, stakeholders and esteemed customers for a long-lasting relationship. We will continue to deliver our commitments with consistency.

We say LIFE IS GROWTH...

OUR VALUES

With humanity as our core value, we intend to serve our customers with integrity, efficiency, commitment & consistency. With a resourceful team we aim to deliver quality products & services and obtain customer satisfaction of the charts.
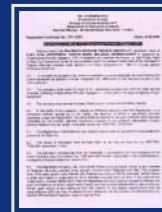

As a learning and growing organisation, we strive to converge physical, emotional, social, logical & national elements for an unparalleled customer's & partner's experience and this is what sets us apart.

With our values deeply rooted, we aim to fulfil our mission and visualise our vision into reality.

We help in delivering content.
